

Please solve the following exercises at home prior to the tutorial:

Exercise 1

Give the Place-value Notation for the following numbers as well as their decimal representation:

1111_2 , $AB1_{12}$, 705_8 , ABC_{16}

The following exercises will be done during the tutorial:

Exercise 2

Convert the following numbers to decimal using Horner's Scheme!

1210_8 , 888_9 , ADA_{16}

Exercise 3

Perform the following conversions:

87599_{10} = to hexadecimal

1234_{10} = to base seven

To verify your result, convert it back to decimal!

Exercise 4

Perform the following conversions:

445_{10} = to dual

7294_{10} = to octal

77875_{10} = to base three

To verify your result, convert it back to decimal!

Exercise 5

Give the Place-value Notation for the following numbers as well as their decimal representation:

1573.4_8 , $ABC.CBA_{16}$, 1011.1101_2 , 0.4_8

Exercise 6

Convert the decimal number 26.4375 to dual, octal and hexadecimal.

To verify your result, convert it back to decimal!
